CUSTOM **PLASTIC** INJECTION MOLDING SERVICES

PREMIER PROVIDER OF PLASTIC PARTS

Molded Plastic Parts & Tubing

Molded Dimensions Group is pleased to offer full-service plastic injection molding capabilities, taking concepts through the complete build cycle to mass production. This division was founded by tool makers, as evidenced by our mold design process, in which each part is designed for manufacturing and proper performance. With AS9100 and ISO 9001:2015 certifications, we make certain that quality standards and requirements are met.

Global Manufacturing

Molded Dimensions Group is equipped to deliver solutions using our international connections in both production and fulfillment. With numerous manufacturing and fulfillment strategies available, we can confidently pledge the most favorable logistics for each product.
